

Tech Rider

Same Love Site Specific by Company MEK

Music

The first three stations will be played with jukeboxes provided by the MEK company. Only the last station, where the dancers will be the longest, will require a music set-up. Optimal:

- Passive system with mixes
- Mini-Jack connection

Lighting

none

Stage

Station 1 = min. 3 x 3 Meters

Station 2 = min. 5 x 5 Meters, if possible, a "playful" environment, such as a playground, sports facility, etc.

Station 3 = min. 5 x 5 Meters

Station 4 = min. 10 x 10 Meters

In terms of space, the first three stations can be easily adapted. More space is needed for the last station so that all dancers have enough room and the constellations are clearly visible.

Needed Material

- Music Set Up for Station 4
- 3 Chairs with armrests for Station 3
- Chairs / Seating for spectators at the last station

Further

- The performance is a site-specific performance that can be performed both indoors and outdoors. It is important for the MEK company to be involved in the venue process.
- The venue must be clearly indicated in advance on the posters, flyers and tickets so that it is clear to all audience members.
- It is important that there is a place of retreat for the dancers (changing room, warm-up), as well as a public toilet for the audience and, if possible, a place to eat (café, bar, etc.).
- The ticket control/evening box office must be clearly visible on the premises.
- We need at least two helpers to accompany the performance.
